

E-Commerce Sales Analysis Dashboard

(Power BI)

★ Project Overview

This project presents a comprehensive **E-Commerce Sales Analysis Dashboard** built using **SQL for data analysis** and **Power BI for visualization**.

The dashboard provides executive-level insights into **sales performance, product intelligence, and customer behavior**, enabling data-driven decision-making for revenue growth and optimization.

The project follows an end-to-end BI workflow — from data modeling and metric validation to advanced DAX analytics and dashboard UX design.

🎯 Business Objectives

- ★ Track overall **sales performance and revenue trends**
 - ★ Identify **top-performing products and categories**
 - ★ Analyze **customer revenue concentration and high-value segments**
 - ★ Understand **regional sales distribution**
 - ★ Support strategic decisions around product focus and customer retention
-

📁 Dataset Description

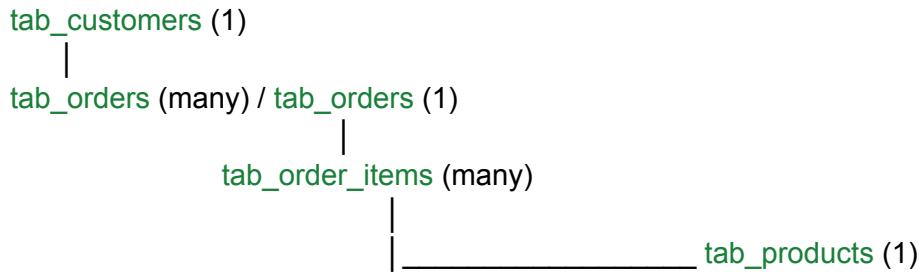

The analysis is based on the following tables:

Table	Description

<code>tab_customers</code>	Customer demographics and region
<code>tab_orders</code>	Order details and order status
<code>tab_order_items</code>	Line-item level sales data
<code>tab_products</code>	Product catalog and categories

Data Model Design

The model follows a **clean star-schema structure**:

Model Best Practices Applied

- ❖ Single-direction relationships
 - ❖ No bidirectional filters
 - ❖ Centralized customer and product dimensions
 - ❖ Line-item level revenue calculation
 - ❖ Optimized for performance and filter integrity
-

Key Metrics & DAX Measures

- ❖ Total Revenue
- ❖ Total Orders
- ❖ Total Customers
- ❖ Average Order Value (AOV)
- ❖ Total Quantity Sold
- ❖ Average Revenue per Customer
- ❖ Product & Customer Ranking (RANKX)
- ❖ Cumulative Revenue & Pareto Analysis (80/20 rule)

Advanced DAX functions used include:

- ❖ SUMX
 - ❖ RANKX
 - ❖ CALCULATE
 - ❖ FILTER
 - ❖ DIVIDE
 - ❖ Context transition techniques
-

Dashboard Pages

1 Executive Sales Overview

- ❖ Revenue, Orders, Customers, AOV
- ❖ Revenue Trend Over Time
- ❖ Revenue by Region
- ❖ Revenue by Category
- ❖ Order Status Distribution
- ❖ Interactive slicer panel (bookmark-based)

2 Product Intelligence

- ❖ Top 5 Products by Revenue
- ❖ Top 5 Products by Quantity Sold
- ❖ Category Revenue Contribution
- ❖ Product Revenue Concentration (Pareto Analysis)
- ❖ Identification of high-impact and low-impact SKUs

3 Customer Intelligence

- ❖ Average Revenue per Customer
 - ❖ Revenue by Region & Gender
 - ❖ Top 5 Customers by Revenue
 - ❖ Customer Revenue Pareto (80/20 analysis)
 - ❖ Revenue dependency insights
-

Dashboard UX & Interactivity

-
- ★ Bookmark-controlled slicer panel (Open / Close)
 - ★ Synced slicers across all pages
 - ★ Clean executive layout
 - ★ Consistent color theme
 - ★ Proper sorting and formatting
 - ★ Interactive filtering across all visuals
-

Key Business Insights

- ★ Revenue is highly concentrated among a small subset of products and customers.
 - ★ Certain regions significantly outperform others in total sales.
 - ★ High-volume products do not always generate high revenue.
 - ★ A small group of customers contributes a disproportionately large share of revenue.
 - ★ Product and customer Pareto analysis highlights dependency risk and optimization opportunities.
-

Business Recommendations

- ★ Focus retention efforts on high-value customers to stabilize revenue.
 - ★ Optimize pricing and promotions for low-revenue high-volume products.
 - ★ Rationalize low-impact SKUs with minimal revenue contribution.
 - ★ Strengthen marketing and logistics strategies in high-performing regions.
 - ★ Use Pareto insights to guide inventory and assortment planning.
-

Tools & Technologies Used

- ★ SQL (Data Analysis & Validation)
 - ★ Power BI Desktop
 - ★ DAX (Advanced Analytics & Ranking)
 - ★ Data Modeling (Star Schema)
 - ★ Business Intelligence & Data Visualization
-

Project Structure

Portfolio Value

This project demonstrates:

- ★ End-to-end BI development
 - ★ Strong data modeling fundamentals
 - ★ Advanced DAX proficiency
 - ★ Business-driven analytical thinking
 - ★ Executive-ready dashboard design
 - ★ Real-world decision support capability
